EDUCATION

M.Sc. Physics and B.E. Mechanical Engineering (Integrated) with THESIS

CGPA: 7.862/10.0

BITS Pilani

Hyderabad Campus

Hyderabad, India

2017 – 2022

EXPERIENCE / PROJECTS

Active Nematic Patterns on Manifolds

PROJECT

Supervisor: Dr. VIJAYKUMAR KRISHNAMURTHY

- Simulating nematics with tensorial order parameter under the Landau-De Gennes framework using FEniCS

International Centre for

Theoretical Sciences

(ICTS-TIFR)

Bengaluru, India

Aug 2022 – Present

Quantification of mixing of two liquids in small-scale, low Re open flows

PROJECT

Supervisors: Dr. MEENAKSHI VISWANATHAN and Dr. ARAVINDA N. RAGHAVAN

- Quantified two different flow fields: An Oscillatory flow (in the presence of a Tear-Drop shaped obstacle), and a flow with entrained vortex (due to a pair of baffle), using Okubo-Weiss parameter (Q) distinguishing the stretched and rotational parts of the flow.
 - Found that the stirring due to Tear-drop obstacle and baffles gave rise to a sequence of: stretch, rotation and stretch, which sharpened the concentration gradient leading to higher mixing.
 - Trying to connect the topological features of the flow, Q and the onset of chaotic behaviour to quantify mixing in small-scale open flows.
-

BITS Pilani

Hyderabad Campus

Hyderabad, India

Jan 2022 – Present

Growth Dynamics of Filamentous Fungal Biofilms

THESIS (Remote Work) - [Link](#)

Supervisor: Dr. ARAVINDA N. RAGHAVAN

- Worked with the team involved in the study of the properties of filamentous fungal biofilms – used in treating industrial effluents.
 - Simulated a mesoscopic model of biofilm growth with five main components: active part density, inactive part density, tip density, internal concentration and external concentration.
 - Varied the internal, external concentration and the geometry to mimic the experimental observations.
-

BITS Pilani

Hyderabad Campus

Hyderabad, India

Jan 2022 – May 2022

Coupling of Electrophysiology and Mechanics of Heart Muscle

THESIS (*Remote Work*) - [Link](#)

Supervisor: Dr. YONG WANG

Max-Planck Institute for
Dynamics and Self-organization
(MPI-DS)

Gottingen, Germany

Aug 2021 – Dec 2021

- Worked as part of the group whose aim is to build an Engineered Heart Muscle patch to treat diseased hearts.
 - Simulated a coupled model of an excitable domain where an electrical impulse propagates, and deforms the domain at its wake – using COMSOL.
 - Focussed on one-way coupling where the electrophysiology (FitzHugh Nagumo model) dictates how the domain deforms (hyperelastic material model) and not vice versa.
-

General Relativity and LISA

SUMMER INTERNSHIP - [Link](#)

Supervisor: Prof. SANJEEV DHURANDHAR

Inter-University Centre for
Astronomy and Astrophysics
(IUCAA)

Pune, India

May 2019 – July 2019

- Learnt the fundamentals of Special and General Theory of Relativity.
- Applied the concept to address the problem of flexing of Laser Interferometer Space Antenna (LISA)'s arms.

SCHOOLS & WORKSHOPS

o [Bangalore School on Statistical Physics – XIII](#)

- Pattern Formation in Biology
- Statistical Physics of Long-range Systems

International Centre for
Theoretical Sciences
(ICTS TIFR)
Bangalore, India

July 2022

o [FINESSE Workshop: Hands-On Interferometer Modelling](#)

Inter-University Centre for
Astronomy and Astrophysics
(IUCAA)
Pune, India

Dec 2019

SKILLS & ACTIVITIES

- **Computing/Software:** Python, MATLAB, COMSOL Multiphysics, LaTeX
 - **Activities:**
 - o Led the University Ultimate Frisbee Team
 - o Part of the Physics Association conducting events and talks for the university audience.
-
